

From : Sue Wylie, May 2020

I'm starting to think about a new piece of writing, not quite sure what sort of form it would take but I would like to hear about people's experiences with Parkinson's, any anecdotes they may have.

They can be funny, outrageous or sad. This invite extends to the caregivers who are often overlooked. I would love to hear from them.

This is just to stimulate some ideas and there is no promise of work included at this stage so please send any submissions to suewylie61@gmail.com

Many thanks and I look forward to hearing back

PS the film of Kinetics is currently available as a free of charge streaming whilst we are all in the lockdown situation. The link is <https://vimeo.com/248010160>

With thanks and best wishes

Sue
